

I urge you to reject NAB's petition 04-160. I pay a monthly fee for the services provided and the NAB should not be able to control what I hear. I find XM radio's instant traffic and weather to very beneficial to me when I travel. I am able to listen to traffic reports for cities that I am in route to and determine the fastest route based upon the traffic information that I receive. I would not be able to use ordinary over the air radio because traffic reports only broadcast on local stations and I am not able to receive them until I am close to my destination. Satellite radio allows me to obtain the traffic and weather info at any point in my journey. Once again, I urge you to reject NAB's petition 04-160.
